CIGAR HUMIDOR
FROM THE CREATOR OF THE WINE CABINET

Designed and made in France since 1976,
EuroCave Cabinets are the best in the world.

Made in France

EuroCave is the only wine cabinet manufacturer to design and make cabinets in France, the global heartland of the wine industry.

Highest Quality Standards

Bestowed with the EPV label, which recognises EuroCave's unwavering dedication to exceptional manufacturing standards.

Award Winning Innovation

Winner of multiple Red Dot Design Awards, one of the world's most prestigious design competitions, recognising their unique features.

Exclusive Patented Technology

EuroCave's elite engineering and design team have developed proprietary technology that delivers unapparelled cellaring precision.

Unique Shelving

Shelves are made of solid oak and other timber. Customise the cabinet to suit your collection, including storage for single and boxed cigars.

Ideal Storage Conditions

The Cigar Humidor offers the perfect environment to conserve cigar quality with stable temperature and humidity.

Cabinets Trusted Worldwide

Recommended by sommeliers and restaurants around the world. Over 40 million bottles are entrusted to our cabinets in more than 70 countries.

Superior Cigar Conditions

Consistent Temperature	EuroCave cabinets maintain consistent set temperature thanks to their exclusive technology, double glazed and argon filled doors, aluminium interior (vs ABS plastic used by many other manufacturers), high quality insulation (equivalent to 2.5m of earth or 4m of concrete) and magnetic door seals which ensure perfect closure.
Maintain Humidity	Working with ambient humidity, EuroCave cabinets maintain optimal humidity for storing cigars.
UV Protection	EuroCave doors filter over 97% of UV rays harmful to wine and cigars and are made of low emissivity treated technical glass. All internal lights are UV free.
High Air Quality	An internal fan and natural ventilation ensure continuous change of air within the cabinet. A charcoal filter makes sure air quality remains clean as cigars can absorb the flavour of their conservation environment.

Ultimate User Experience

Fits Original boxes or Individual Cigars	EuroCave Cigar Humidors include shelving that provides flexibility and the ultimate protection of your cigars. A storage drawer and fixed half shelves are able to store all kinds of cigar boxes while the presentation tray stores individual cigars in adjustable solid oak compartments.
Luxurious Lighting	Showcase cigars in soft amber internal lighting that is not harmful to the collection.
High Energy Efficiency	Consuming up to 67% less energy than mass market humidors, EuroCave cabinets are gentle on the environment and economical to run.
Low Noise Emissions	EuroCave cabinets have low acoustic levels as they are equipped with one of the quietest European-made compressors on the market and insulation that absorbs interior noise.
Touch Control Panel	The panel displays both temperature and humidity. Light settings can easily be changed and filter replacement reminders help protect cigar collections.
Alarms & Locking System	Audible and visual alarms activate if the door is accidentally left ajar. The robust locking system provides additional security.

SPECIFICATIONS

Capacity	700 - 1000 cigars (depends on number of individual cigars vs boxes)
Temperature	Single Temp – for conserving cigars
Temperature Range	5-20°C (enhanced fan system ensures even temperature distribution)
Humidity Range	60-75% (includes two humidity cartridges)
Control	Touch screen electronic temperature and humidity display, alarm and filter countdown
Energy Rating	A (128 kWh/year – Uses up to 67% less energy than traditional cabinets)
Door	Full Seamless Glass (double glazed, argon filled & UV protected)
Opening	Right or left hinge (Full glass door interchangeable)
Security	Robust locking system with two keys and keyring
Handle	Handle can be attached or remain detached for sleek look
Shelving Types	Storage Drawers Presentation Shelf Fixed Half Shelf
Shelving Configuration	Comes standard with 2 x Storage Drawers, 1 x Presentation Tray, 1 x Half Shelf Designed to accommodate both single cigars and boxes in your collection
Lighting	UV free internal LED cold amber lighting with 3 settings and LED strip lighting
Noise	Quieter than a standard fridge
Filter	Carbon filter ensures air remains fresh
Room Temp	0-35°C
Cold Production	Compressor (R600a gas)
Inner Material	Aluminium
Exterior Coating	High density fiber
Insulation Type	PU foam (59mm)
Warranty	3 years

DIMENSIONS

Height (mm)	960
Width (mm)	680
Depth (mm)	690
Cabinet weight (kg)	60

*715mm with stop at the back not including the handle

Full Glass Door

FREQUENTLY ASKED QUESTIONS

Why are EuroCave wine and cigar cabinets considered to be the best globally?
EuroCave invented the very first wine cabinet in 1976. They are dedicated to producing the highest quality, most aesthetically pleasing, and technologically advanced cabinets in the world. EuroCave wine and cigar cabinets are designed AND manufactured in France, and they address all the requirements for storing wine and cigars correctly. A strong focus on high energy efficiency, unique and patented features, and longevity makes EuroCave stand out from mass market fridge brands.

EuroCave is the wine and cigar cabinet of choice for serious enthusiasts, and they are featured globally in many hatted restaurants, leading wineries, 5-star hotels and luxury residential developments.

Why haven't I heard about EuroCave before?
With over 80 distributors worldwide, EuroCave has a significant presence in Europe, USA, Asia and other parts of the world. In Australia, EuroCave has been distributed directly to the end customer for over 25 years. Dedicated to producing the best wine and cigar cabinets, EuroCave reinvests in R&D rather than 'above the line' advertising.

What is the cigar capacity of the humidor?
Depending on the layout and your collection, you can store 700 – 1000 cigars.

Can the handle be removed?
EuroCave handles come packaged inside the unit. They can be easily attached if required or can remain detached. Doors can easily be opened without attaching the handle.

Every EuroCave cabinet receives a meticulous quality assurance check before leaving the warehouse to ensure all systems are functioning, and the unit is clean, scratch free and ready for its new home.

What are ideal conditions for storing cigars?
Habanos and other cigars do not like variations of temperature and humidity. Humidity should be between 65% - 72%, and temperature between 18°C - 22°C.

Are EuroCave cabinets noisy?
No. EuroCave cabinets are quieter than a standard fridge; 37(dB(A)).

Where should I install the power point?
Position the power point at the back of your cabinet, towards the bottom. The use of multi socket plugs and extensions is not recommended. If installing multiple units, we recommend a separate power supply for each.

How energy efficient are EuroCave cabinets?
Very! A small single temperature EuroCave cabinet consumes approximately 128 kWh/year on average.

Can we change the lighting options?
EuroCave uses amber lighting which enhances the ambience of your collection. The colour of the lighting cannot be changed. All cabinets have 3 setting options for lighting; 1) Lights remain on, 2) Lights remain off 3) Lights turn on only when the door is opened.

Can EuroCave cabinets go outdoors?
No. EuroCave cabinets are not weatherproof and must be kept away from harsh conditions.

USABILITY, CARE AND MAINTENANCE

How do I get the best out of the EuroCave cabinet?
Scan the QR code below to Register your EuroCave for Warranty, gain access to the Quick Start Guide, Maintenance Information, Product Guides, User Manuals and more.

Do I need to remove the cabinet from its location for maintenance?
No, the cabinet can remain in place for regular filter replacement and cleaning.

For technical issues involving the cooling system or electronic control panel, the cabinet may need to be moved. This must be performed by a qualified technician recommended by a EuroCave vendor.

Can I control humidity?
Whilst EuroCave cabinets display both temperature and humidity, humidity in the cigar cabinet cannot be controlled because it is influenced by the ambient humidity in its specific environment. Humidity does not need to be as precise as temperature; it should be above 50% and ideally 65% to 72% so that the tobacco leaves release all their flavours.

What temperature do I set the Cigar Humidor?
Temperature and humidity changes can adversely affect the quality of cigars. It is recommended that temperature should be maintained between 18°C and 22°C.

FREQUENTLY ASKED QUESTIONS

CIGAR HUMIDOR CABINET

Are 3D files available?

Yes, 3D files for each model can be found by scanning the QR code.

Can the Cigar Humidor be built into joinery?
Yes. Please refer to the Installation Instructions in this Product Guide.

Are there any special ventilation requirements?
Yes. Please refer to the Installation Instructions in this Product Guide.

Are the doors reversible?
Yes.

Can a joinery panel be attached to the door?
No. The Humidor has a full glass door that is not designed to be attached to joinery.

What about the door swing? Does it have to open at 180 degrees to pull out a shelf? Can I position the Humidor next to a wall?
The Cigar Humidor can be positioned adjacent to a wall because shelves can fully slide out when the door is opened to 90 degrees. Also, whilst the inset door hinge 'protrudes' only 3mm at most (when the door is open at its maximum of 45 degrees), a 10mm gap should be kept between the wall and the Humidor.

Can the Cigar Humidor be placed in a room, without building it into joinery?
Yes.

What are the electricity requirements?
EuroCave's cigar humidor can simply be plugged into a standard power point (standard 10A outlet, on a 16A circuit, earthed with 30mA circuit breaker).

Can I place multiple EuroCave's side by side?
Yes. For aesthetic purposes, we recommend placing a solid vertical panel between each EuroCave cabinet. Allow at least 10mm between walls/panels and cabinets for ventilation and ease of installation. It is very difficult to perfectly 'line' up cabinets as most walls / floors and joinery are 'out', even by a few millimetres. Please refer to the Installation Instructions in this Product Guide.

Can I change the lighting options?
There are 3 setting options for lighting; 1) Lights remain on, 2) Lights remain off 3) Lights turn on only when the door is opened.

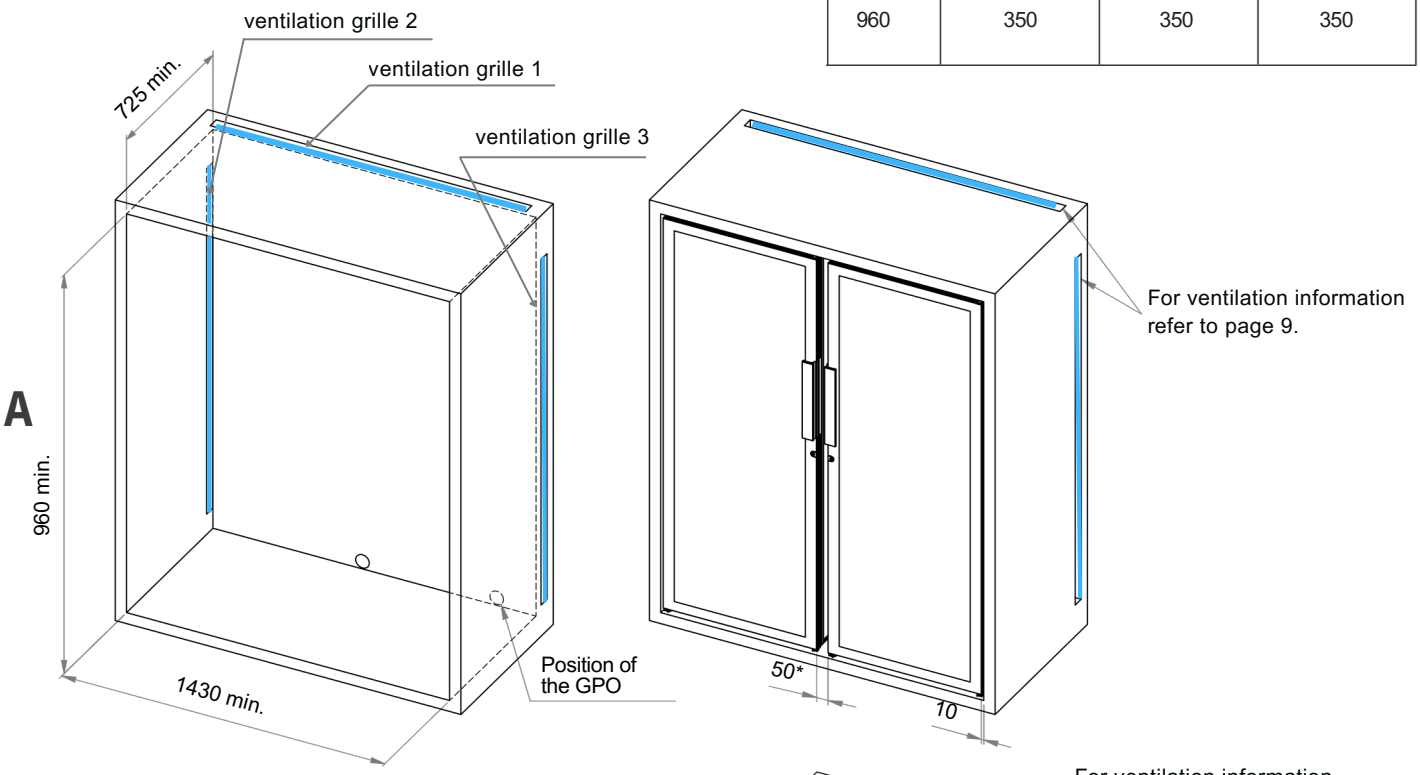
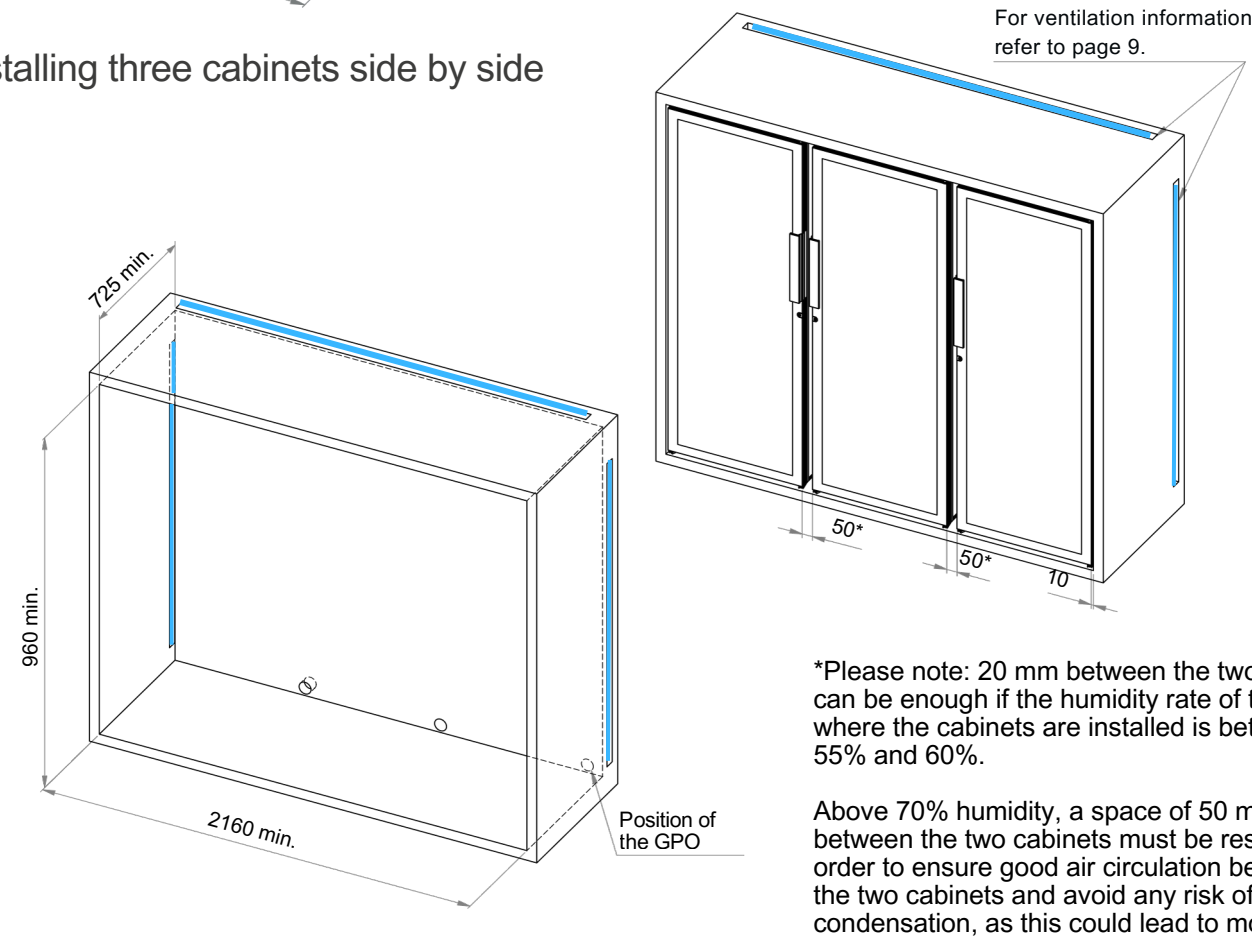
Installing two cabinets side by side

per unit			
A min (mm)	Ventilation grille 1 (cm2)	Ventilation grille 2 (cm2)	Ventilation grille 3 (cm2)
960	350	350	350



Installing three cabinets side by side

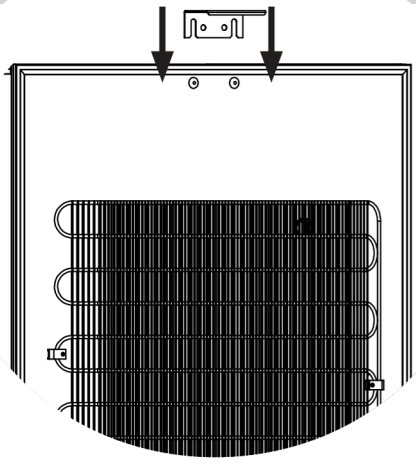


*Please note: 20 mm between the two cabinets can be enough if the humidity rate of the room where the cabinets are installed is between 55% and 60%.

Above 70% humidity, a space of 50 mm between the two cabinets must be respected in order to ensure good air circulation between the two cabinets and avoid any risk of condensation, as this could lead to mould.

INSTALLING YOUR EUROCAVE

1. Your EuroCave must be situated in a well ventilated room (e.g. not in an enclosed cupboard) that is not too humid (e.g. laundry, bathroom).
2. Place the cabinet near its final location (which must have a level and stable floor).
3. Ensure it is supplied with power (standard outlet, 16 A, earthed with 30mA circuit breaker).
4. To maximise energy efficiency, attach the 'Stop' (from the accessories kit) to the back of the cabinet. This ensures a space of 69mm between the wall and the rear of the cabinet. To fix the ‘Stop’, gently place the two caps in the two holes at the top of the cabinet. Do not push the caps all the way in. Slide the ‘Stop’ downwards, then push the two caps all the way in.
5. Ensure the power lead is securely plugged into both the unit’s socket, (located at the back / near the bottom of the cabinet) and power point. Switch on the power point.
6. If you need to adjust the feet, tilt the cabinet slightly to screw/unscrew the feet.
7. Remove the transportation locks supporting each shelf (these are only required during transport).
8. Remove the door stopper (this is only required during transport).
9. Unless already installed, push the carbon filter (from accessories kit) into the hole inside the top/back panel (top shelf may need to be removed). Press to set the filter countdown, then "+" to reset to 365 days.
10. Place your EuroCave in its final location, then load your cigars, starting from the bottom shelf and wait 48hrs before starting up your EuroCave.



How to ensure good ventilation when joinery reaches the ceiling

Ensuring good ventilation to a cabinet
when built-in up to the ceiling.
